- Making Integration a Reality

# **Integration “works”, but it’s not a panacea**

- Stigma mitigates impact of integration
- Few data demonstrating impact on outcomes
- Limited data on cost-effectiveness

# **One Model Doesn't Fit All!**

- “Supermarket” & “One Stop Shop”
- Into HIV vs. RH services—where can we go from here?
- Need to incorporate community needs

# **Huwoman & Human Rights Approach Essential to Integration!**

- Client-centered care—high quality RH/HIV care
- Empower people to demand quality services
- Inclusion of key populations: MSM, Sex Workers, Drug Users, HIV-discordant couples, migrants

# **What Gets Measured Gets Done!**

- Need for an 'Index of Integration'
  - MOH, PEPFAR indicator
- Importance of documenting and sharing information
- Evidenced-based research designed to inform scale-up

# **In 2012 Integration Became Reality**

- Community, regional, and national stakeholders advocate integration
  - Inclusion in national plans and budgets
- Country leaders take ownership
  - establish a minimum package of integrated services
- Donors and ministries of health fully support integration
