

Abstract number (127)

Design of postpartum interventions for reducing maternal and infant morbidity and mortality by integrating mother and child services in Burkina Faso

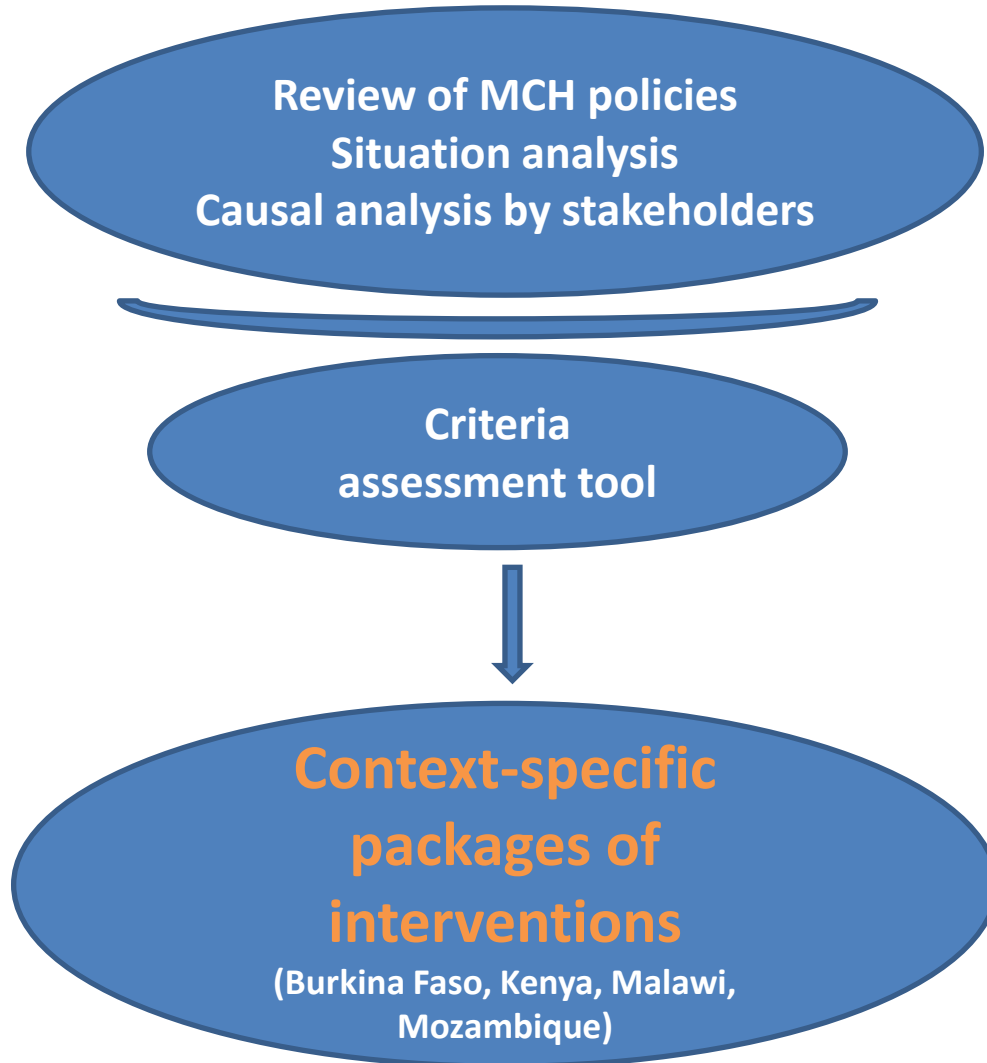

Danielle Yugbare Belemsaga, Charles Kaboré, Seni Kouanda

Integration for Impact –
Reproductive Health and HIV services in Sub-Saharan Africa
Nairobi, Kenya
September 13, 2012

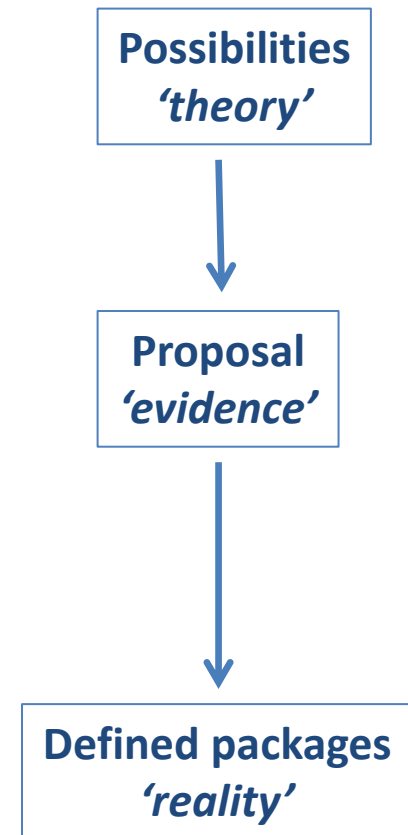

Methods

Selection process

Outcome

Findings

- **Identified interventions**
 - Strengthen existing facility-based postpartum care (quality of care)
 - Integrate postpartum care in child-health clinics
 - Involve CHW (community mobilization for PPC)
- **To be validated by stakeholders before implementation**
