

**From policy to implementation,
addressing challenges to service delivery**

By

Sekoni Adekemi, Enenche John Paul

Service Provision

- Total number of clinical service provider – 67
(Doctors, Nurses/Midwives, CHOs, CHEWs)
- Maternal & child health services – 67
- HCT services – 11 (16%)
- Provision of family planning services to HIV positive women – 4 (6%)

Constraints

- Consumables were not always available
- Inadequate human resource to cope with workload
- Lack access to training/continuous medical education
- Referral centre far from the PHCs
- Lack of feedback from referred cases
